DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to an apparatus comprising an inflatable body with a plurality of support structures and an antenna disposed on the outer surface, shown in figure 2 and classified in class 343, subclass 720.
 - II. Claims 6-12, drawn to a transmission line comprising a conductor and an inflatable tube, shown in figure 3 and classified in class 333, subclass 222.
 - III. Claims 13 and 14, drawn to a quasi coaxial transmission line comprising a conducting transmission line and a first and second flexible membrane, shown in figure 5 and classified in class 333, subclass 26.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and III have separate utility; for example, inventions II and III are capable of transmitting other signals besides those emitted from the apparatus of invention I. See MPEP § 806.05(d).

Art Unit: 2821

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
